to MAARC Newsletters

and MAARC’s

Radio Age

April 2018 Edition

(Through April 2018)

Note: This index is also available on-line on MAARC’s Website:

www.maarc.org
MAARC newsletters began with Volume 1, Number 1, in August 1984 and continued until the May 1994 issue, which was Volume 11, Number 5. MAARC began publishing Radio Age as its newsletter in June 1994, after purchasing the rights to this publication from its original publisher, Don Patterson. The first issue of Radio Age published by MAARC was the June 1994 issue, designated Volume 19, number 1. This index covers all issues of the MAARC newsletters and the issues of Radio Age between June 1994 and April 2018.

PDF versions of back issues of all newsletters are available for MAARC members on the MAARC website. If you have trouble accessing them, contact the MAARC webmaster.

Paper copies of most back issues are available at nominal cost from MAARC. See page 2 of the most current Radio Age or the MAARC website for the current price of back issues and ordering instructions. Please request copies of back issues by month and year, not by Volume number and allow two to four weeks for delivery. Make your check or money order payable to MAARC.

The index below lists items by author and by subject matter (keywords). Numbers precede letters in the alphabetizing scheme used here. The reference is coded as abbreviated month and year, a colon, and the page number(s). For example, Jun86:7 means the referenced information can be found on page 7 of the June 1986 issue of the newsletter. Note that there were a few issues of the newsletter in which the date footer on the inside pages showed an incorrect month. Check the date on the front page to verify the correct month, although there may have been an error or two there, too. Ad reproductions are listed at the beginning of each manufacturer’s listing. Book reviews are listed by book author under the heading "Book Reviews" as well as under the name of the reviewer.

We have tried to make this index error-free, but proofreading a document such as this is daunting! Should you uncover an error as you use it, please notify Brian Belanger (address, phone number, and email address are on page 2 of Radio Age) so the error can be corrected in the next edition.
